MAKE HEAT
SIMPLE°CH

SET YOUR COMFORT
FROM A DISTANCE.

MakeHeatSimple.ch

swiss energy
Our commitment: our future.

Simple like MakeHeatSimple.ch

By controlling the temperature of your home from a distance, you improve comfort and reduce energy costs. The site **MakeHeatSimple.ch** accompanies you step by step in the installation of a wireless control system for the heating of your second home.

There you will find tools for a first diagnosis of your needs, information on remote heating and contacts of professionals in the vicinity.

Simplify your energy savings

Find a **professional near you** to plan the installation.

Go to **MakeHeatSimple.ch**

Install the **adequate wireless heating control system**.

Diagnose your needs and find a suitable system **in 6 questions**.

Wherever you are, you control the temperature and **your energy costs**.

INSTALLER

Find a professional near you

Whether you're in a big city or a small village, the **MakeHeatSimple.ch** website makes it easy to find a professional near you who will accompany you throughout the installation.

Sustainable investment

Estimate your savings potential based on your current expenses and your heating habits with the online calculator on **MakeHeatSimple.ch**

FROM CHF 500 TO 2,500

The cost of a wireless heating control system.

CHF 1,300

Your potential for annual savings.

60%

Save up to 60% energy compared to your usual consumption.

A SWISSENERGY INITIATIVE

MakeHeatSimple.ch is a SwissEnergy campaign to promote wireless heating control systems for second homes. These will save up to 2,200 GWh/year of energy in Switzerland. Many suppliers sell systems for almost all types of heating. The **MakeHeatSimple.ch** campaign is for everyone! It does not promote a particular brand or product, but encourages homeowners to learn about heating solutions and install the system that suits their needs.
